

Sorensen Self-Esteem Test

By Marilyn J Sorensen, PhD, Clinical Psychologist & Author

Adapted from her book, *Breaking the Chain of Low Self-Esteem*

Do you think you may suffer from low self-esteem? This questionnaire will help you find out. Low self-esteem (LSE) is often misunderstood, and it is even misdiagnosed by many therapists as being a secondary concern. Rather than being merely a symptom, LSE is frequently the root cause of many psychological, emotional, personal and relationship issues. Treatments that do not focus on recovery from LSE may not be effective, because they are not dealing with the core issue.

INSTRUCTIONS: Click to place a check next to the number of each statement that you find to be true. Your score will be displayed and explained at the bottom of the second page.

YOUR SCORE

- If you checked:
- 00-04 Statements You have fairly good self-esteem
 - 05-10 Statements You have mild low self-esteem
 - 11-18 Statements You have moderately low self-esteem
 - 19-50 Statements You have severely low self-esteem

It's important to realize that your score on this questionnaire in no way indicates that you are not a quality person. Instead what it does is to measure how you view yourself. If you have a healthy view of yourself, your score will be low. If your view of yourself is unhealthy, your score will be high.

Be aware that it will be difficult to raise children with healthy self-esteem, if you yourself suffer from low self-esteem. Without realizing it, you will pass on the attitudes, fears, and thinking that accompany low self-esteem.
